

Fibonacci series

Fill in the stripes below with the colours from your picture in their order of proportions

size	order
30	1
30	1
60	2
90	3
150	5
240	8
390	13

Mathematician Leonardo Fibonacci arrived at a series of numbers where each number is the sum of the previous 2 numbers. This number is the ratio found in spirals, found everywhere in nature. When these proportions are used, it will always look right.
